FORSIDE

abortion	forestry	that have received	injustice	proun
accessibility	climate variability	recent attention	institutional	pronouns
accessible	climate-change	from Congress	integration	prostitute
activism	climate-smart	equity	intersectional	pyrolysis
activists	commercial sex	equity topics	intersectionality	QT
advocacy	worker	that have received	intersex	queer
advocate	community	widespread or	issues concerning	race
advocates	community diversity	critical media	pending legislation	race and ethnicity
affirming care	community equity	attention	Justice 40	racial
affordable home	confirmation bias	ethanol	key groups	racial identity
affordable housing	contaminants of	ethnicity	key people	racial inequity
agricultural water	environmental	evidence-based	key populations	racial justice
agricultural water	concern	excluded	Latinx	racially
air pollution	continuum	exclusion	lesbian	racism
all-inclusive	Covid-19	expression	LGBT	runoff
allyship	cultural competence	female	LGBTQ	rural water
alternative energy	cultural differences	females	low-emission vehicle	safe drinking water
anti-racism	cultural heritage	feminism	low-income housing	science-based
antiracist	Cultural relevance	fetus	male dominated	sediment remediation
asexual	cultural sensitivity	field drainage	marginalize	segregation
assigned at birth	culturally	fluoride	marginalized	self-assessed
assigned female at birth	appropriate	fostering	marijuana	sense of belonging
assigned male at birth	culturally	inclusivity	measles	sex
at risk	responsive	fuel cell	membrane filtration	sexual preferences
autism	definition	gav	men who have sex	sexuality
aviation fuel	DEI	GBV	with men	social justice
barrier	DEIA	gender	mental health	social vulnerability
barriers	DEIAB	gender based	methane emissions	socio cultural
belong	DEIJ	gender based	microplastics	socio economic
bias	diesel	violence	migrant	sociocultural
biased	dietary guidelines/	gender diversity	minorities	socioeconomic
Biased toward	ultraprocessed	gender identity	minority	status
biases	foods	gender ideology	minority serving	soil pollution
Biases towards	disabilities	gender-affirming	institution	solar energy
bioenergy	disability	care	most risk	solar power
biofuel	disabled	gendered	MSI	special populations
biogas	disadvantaged racial	gender	msm	stem cell or fetal
biologically female	diversity	geothermal	multicultural	tissue research
biologically male	discriminated	GHG emission	Mx	stereotype
biomethane	discrimination	GHG modeling	Native American	stereotypes
bipoc	discriminatory	GHG monitoring	NCI budget	sustainable
bisexual	discussion of	global warming	net-zero	construction
Black	federal policies	green	non-conforming	systemic
black and latinx	disparity	green infrastructure	noncitizen	they/them
breastfeed + people	diverse	greenhouse gas	nuclear energy	tile drainage
breastfeed + person	diverse backgrounds	emission	nuclear power	trans
Cancer Moonshot	diverse communities	groundwater	obesity	transsexual
carbon emissions	diverse community	pollution	opioids	transgender
mitigation	diverse group	Gulf of Mexico	oppression	transitional housing
carbon footprint	diverse groups	H5N1/bird flu	oppressive	trauma
carbon markets	diversified	hate	orientation	traumatic
carbon pricing	diversify	hate speech	pansexual	tribal
carbon sequestration	diversifying	health disparity	PCB	two-spirit
CEC	diversity	health equity	peanut allergies	unconscious bias
changing climate	diversity and	hispanic	people + uterus	under appreciated
chestfeed + people	inclusion	hispanic minority	people of color	under represented
non-binary	diversity/equity	historically	people-centered	under served
chestfeed + person	efforts	housing	care	underprivileged
nonbinary	EEJ	affordability	person-centered	underrepresentation
clean energy	EJ	housing efficiency	person-centered	underrepresented
clean fuel	elderly	hydrogen vehicle	care	underserved
nonpoint source	electric vehicle	identity	PFAS	understudied
pollution	energy conversion	ideology	PFOA	undervalued
clean power	enhance the	immigrants	photovoltaic	vaccines
clean water	diversity	implicit bias	polarization	victim
climate	enhancing diversity	implicit biases	political	victims
climate	subsidized housing	inclusion	pollution	vulnerable
accountability	entitlement	inclusive	pollution abatement	vulnerable
climate change	environmental	inclusive leadership	pollution	populations
climate consulting	justice	inclusiveness	remediation	water collection
climate crisis	environmental	inclusivity	prefabricated	water conservation
climate model	quality	increase diversity	housing	water distribution
climate models	equal opportunity	increase the	pregnant people	water efficiency
climate resilience	equality	diversity	pregnant person	water management
climate risk	equality	indigenous	pregnant persons	water pollution
climate risk	equitable	indigenous	prejudice	water quality
climate science	equitable topics	community/people	privilege	water storage
climate smart	of federal	inequalities	privileges	water treatment
agriculture	investigations	inequality	promote	wind power
climate smart	equitableness	inequitable	promote diversity	woman
	equitableness topics	inequities	promoting diversity	women

«Ord er makt», heter det. Den siste tiden har vi sett mange eksempler på hvordan språk brukes som våpen. Hva man kaller eller ikke kaller noe, virker inn på internasjonal politikk, forskning og hvordan vi oppfatter vår felles virkelighet. Og med det påvirkes millioner av menneskers liv.

Trump-administrasjonens bannlysning av ord i akademien innskrenker forskeres frihet og truer verdier som mangfold, likhet og inkludering. I pridemåned er det spesielt viktig at vi markerer motstand mot diskriminering av LHBT+-personer. Det kan du lese mer om i to av våre inviterte kommentarer i dette nummeret.

Forsiden er laget av Peder Bernhardt, visuelt ansvarlig i Tidsskriftet, og viser et utdrag av ord som ikke skal brukes i amerikansk forskning. Listen er hentet fra <https://pen.org/banned-words-list/>, lest 21.5.2025.
